

Why join GFT?

You will work with and learn from top IT experts. You will join a crew of experienced engineers: 60% of our employees are senior level.

Interested in the cloud? You will enjoy our full support in developing your skills: training programs, certifications and our internal community of experts. We have strong partnerships with top cloud providers: Google, Amazon and Microsoft - we are number one in Poland in numbers of GCP certificates. Apart from GCP, you can also develop in AWS or Azure.

We are focused on development and knowledge sharing. Internal expert communities provide a comfortable environment where you can develop your skillset in areas such as blockchain, Big Data, cloud computing or artificial intelligence.

You will work in a stable company (32 years on the market) in demanding and challenging projects for the biggest financial institutions in the world.

As a **Junior Appian Engineer** you will be responsible for creating and designing software applications based on customer specifications, developing codes, algorithms and data structures in the Appian framework. Your duties will also include integrating software components with third-party programs, testing and deploying programs and systems as well as troubleshooting, debugging and upgrading existing software, performing post-deployment maintenance and support, collecting and evaluating user feedback.

Requirements:

- Graduate or last year student of IT or graduate of Bootcamp
- One year of non-commercial experience in programming (internship, university projects, Github projects)
- Full time availability
- Fluency in English (spoken and written)
- Analytical skills
- Willingness to learn new technologies and tools

We offer you:

- Full time employment, in hybrid mode (Warsaw office)
- Training programme in Appian and a certification session
- Opportunity to gain experience and learn from professionals
- Competitive salary and extra benefit package that can be tailored to your personal needs (private medical coverage, sport & recreation package, lunch subsidy, life insurance, etc.)
- On-line training and certifications fit for career path
- Free on-line foreign languages lessons
- Regular social events
- Access to e-learning platform
- Ergonomic and functional working space with 2 monitors
